

PROCESS INTELLIGENCE PLATFORM FOR MATERIAL RECOVERY & RECYCLING PLANTS

India's recycling sector is scaling rapidly under EPR mandates, high quality recycled granules requirements, and increasing brand-owner supply chain scrutiny. GREEN AADHAAR provides the operational and compliance infrastructure that enables recyclers to meet these demands with verified, audit-ready data.

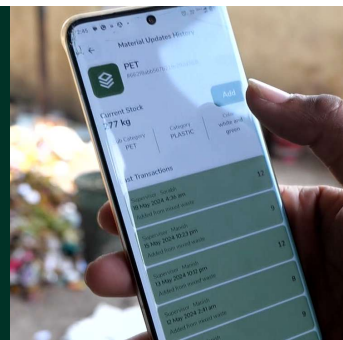

Deployed across 31 plants

354+ plant operators trained

41,700+ tonnes material tracked

4,000+ working hours saved / plant

Every batch verified at the gate

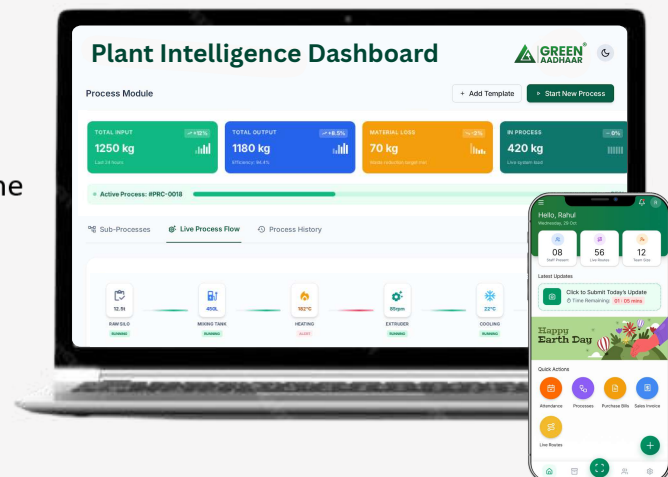

Every truck entered at plant with unique #lot id
Material weight, vendor & grade at source QC linked
No retrospective data entry & no disputed records

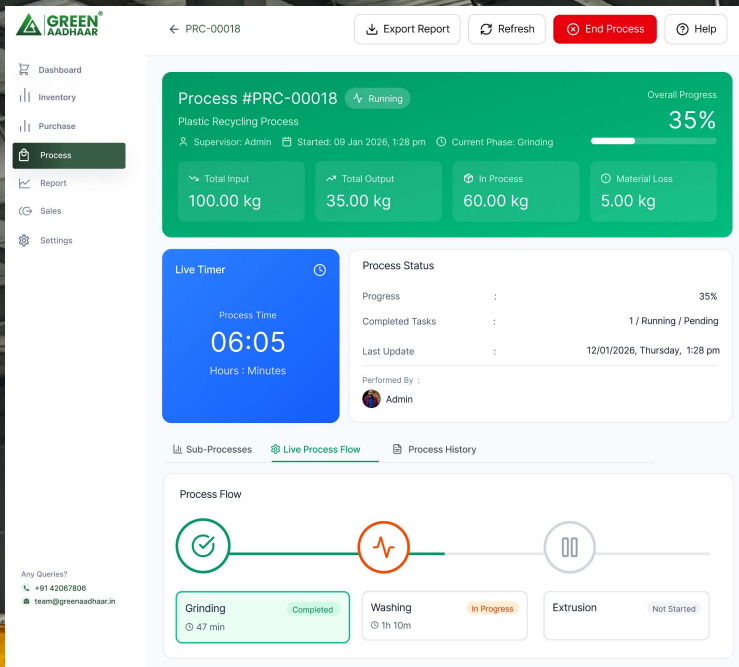

Mass balance closes at every process step

Process line visibility across Sorting - Washing - Extrusion
Input, output & loss/rejects reconciled at each step
Every unaccounted kgs attributed by shift & vendor lot

One platform. Complete operational visibility.

Yield, manpower, machines, material flow tracked in real time
Every compliance record generated without manual efforts

Built exclusively for plastic waste processors, MRFs, and multi-stream recycling facilities operating under India's EPR framework.
